

Renewable Energy for the Green Economy

Get training to launch a new career in the clean tech industry

The Renewable Energy for the Green Economy course is a 5 week training program to equip those who wish to launch a new career in the industrial evolution, transforming from fossil fuel to the clean and renewable energy. The course highlights the solar photovoltaic energy generation, energy efficiency, LED lighting system, green LEED building and the new electric vehicle industry. The course includes lectures, guest lectures, and hands-on workshops which are taught by experienced instructors and seasoned renewable energy specialists in the industry.

Course Topics include:

- Renewable Energy & Sustainability
- Introduction to Solar Photovoltaic
- Thin Film Photovoltaic
- Solar Heating Systems
- Wind energy
- Energy Efficiency Auditing
- LED Lighting
- Green Building
- Electric Car Batteries Technology
- Electric Car Conversion Project

Course Requirements:

High school diploma with at least 5 years of work experience in any industry.

Upcoming Training Dates:

December 7, 2010 to January 22, 2011
January 25, 2011 - February 19, 2011
February 22, 2011 - March 12, 2011

Course Schedule: (to be confirmed)

Tuesday & Thursday:
6:30 PM - 8:30 PM evening
Workshop on Saturday morning
9:00 AM-12:00 PM

TUITION: \$1,495.00

The Clean Tech Institute is an accredited training provider by the Alliance for Employee Growth and Development. The tuition of this training program is fully funded by the Alliance.
